Two Finger Scroll is a software for Microsoft Windows that allows users to define special buttons on the touchpad and assign them different functions. The application was created for the purpose of simulating the scrolling function of the touchpad on a laptop. It provides the user with a series of special buttons on the touchpad, allowing them to perform different actions at the same time. The user can use this function with the two fingers on the touchpad and can even assign a third finger to the same button to make it easier for him. It is also possible to combine the assigned commands or buttons on the touchpad. Additionally, the user can also change the settings of the scroll buttons. This way, the user can adjust the speed and acceleration when scrolling in the most suitable manner for him.
