[32|64bit]**

DotConnect for Oracle is a data provider for Oracle with ADO.NET.
Features: - Easy to use - Programmatic deployment - Works with SQL Server, Oracle, Informix - In line imports - With

MVC enabled - SQL Server, Oracle,
Informix - Unicode support for all data
types - Data provider for Oracle, SQL
Server, and Informix - Stored
procedures, functions, cursors, and
triggers - Bindings to Access, MySQL,
MS SQL Server, SQLite, Oracle,
Informix - Data mapping to the OLE
DB DataSource with the appropriate
provider - Link to the Oracle UC using
SQL*Plus - From MSSQL to Oracle -

Oracle DBMonitor to track all the Oracle components - For Web apps, Oracle DataSource, Oracle Advanced Queue - Integration Services: import and export of data from and to Oracle Servers - DDL logging - DDL support (all types of SQL, including PL/SQL) - Reactive DDL - Database events monitoring - Automated schema and data upgrades - Loads external tables and views via Import Wizard, Oracle

DataSet Wizard, or Mapping Wizard -
Client data access support - DDL
processing for views, schemas, tables,
procedures, and packages -
Comprehensive free data model support
for Oracle - Powerful built-in tool for
creating and modifying models, views,
schemas, procedures, packages, objects,
and tables - Powerful built-in tool for
creating and modifying models, views,
schemas, procedures, packages, objects,

and tables, including Oracle DataSet objects - DataSet tool for creating and modifying typed and untyped DataSet objects - Entity developer for creating and modifying classes for ORM support - Database connection testing - DDL logging - Database events monitoring - Transparent app failover - REF cursors - Built-in SQL Server and Oracle DataSource - Built-in support for Windows Event Log - Built-in support

for ASP.NET session state - Built-in site
map and profile support - Built-in
support for Cache (memcached), SQL
Server, Oracle, Informix - Built-in
support for Memcached - Support for
NHibernate - Support for ADO.NET
Entity Framework - Support for Oracle
SQL*Plus - Integration of various
content providers like from files, FTP,
SQL 77a5ca646e

dotConnect for Oracle allows you to create, modify, and manage, using ADO.NET, your data access code for both Oracle and SQL Server data sources. It consists of an ADO.NET data provider, as well as a set of .NET data access components that provide data-level abstraction, transparent connection handling, object mapping,

and object-to-object mapping capabilities for developing powerful, easy-to-use, and fast data access programs that run on both Oracle and SQL Server data sources. dotConnect for Oracle supports ADO.NET Modeling and Code Generation, migration from ODBC, ODBC3, OLEDB, ADO, DSN, Oracle, IMS, Sybase, SQL Server, and MySQL. It also offers complete support for Visual

Studio and ASP.NET development.

What's New In?

dotConnect for Oracle Professional Edition gives you the ability to create and design Oracle-based database programs using ADO.NET. It supports advanced queing, pipes, alerts, direct path loading, transparent app failover, REF cursors, change notifications,

packages, and objects, among other features. The data provider can be integrated with Visual Studio Server Explorer and other tools, featuring comprehensive tools for customizing visual components. For example, with the aid of DataSet tools like DataSet Wizard, DataSet Editor, DataSet Manager, you can create and design typed and untyped DataSets. ORM models can be developed using Entity

Developer. dotConnect for Oracle offers support for NHibernate, ADO.NET Entity Framework and LinqConnection (previously known as LINQ to Oracle), a proprietary ORM solution that resembles Microsoft LINQ to SQL. Using Direct Mode, your applications can be connected with Oracle directly via TCP/IP connections without having to resort to Oracle Client. Furthermore, dotConnect for Oracle comes bundled

with role, membership, session state, site map, profile and other ASP 2.0 providers. It can be used alongside Microsoft Enterprise Library Data Access Application Block, monitor each component in the database events using a free dbMonitor application, as well as import and export data from and to Oracle Servers via Integration Services. As far as supported classes are concerned, the program supports Native

data types (both classes and structures),
OracleScript, OracleMonitor,
OracleDataTable, OracleDataSet,
Oracle Loader, OracleAlerter,
OraclePipe, OracleTrace,
OracleDependency, and DataLink. It
also supports the Oracle DataSource
component for web apps, Oracle
Advanced Queue, Workflow
Foundation, SQL Server Business
Intelligent Solutions, Sync Framework,

InterForm, Oracle Package Wizard, Oracle Object Wizard, and Migration Wizard. The current version of dotConnect for Oracle offers support for Oracle 12c, 11g, 10g, 9i, 8i, 8.0 and 7.3 as well as .NET Framework 2.0 and higher. It's available in five editions: Developer, Professional, Standard, Mobile, and Express. dotConnect for Oracle Mobile Edition Description: dotConnect for Oracle Mobile Edition

gives you the ability to create and design Oracle-based database programs using ADO.NET.
