## ITC Retail Assistant Crack + Serial Number Full Torrent Free

KEYMACRO is a simple but powerful inventory and accounts payable management software designed for small and medium businesses. Create sales, purchase order and products easily. Monitor your sales, PO's, incoming stocks, inventory. Manage your clients and suppliers. Handle your accounts payable and receivables. Superb user level assignment and log activity. KEYMACRO Pricing: KEYMACRO is an all-in-one inventory and accounts payable management software that offers best in class features and workflow. You can assign any number of users with their own individual logins. Each user has their own role based permissions. You can configure the software to send automated email notifications for PO's and Sales orders. This can be done by simply configuring the alert settings from the software's admin panel. A client can be added by assigning a new client to them and the new client is added to the clients list as well. Multiple customers can be managed from within one interface. You can create accounts payable for each customer and associate the account with a particular customer or all the customers for which you have invoices to be paid. Once the accounts payable invoice is created, you can apply online payments. To add a product to the inventory, you can simply add a product and it is added to the respective inventory list as well as to the shipment list. You can add a product to the customer's order and automatically add that product to the invoice as well. You can choose to add a product from multiple options. This makes sure that the stock levels for all the items is in sync and updated as soon as you add a new product. You can assign products to a customer and the products are added to the respective customer order for which the order was created. You can create multiple products at a time and assign them to multiple customers and multiple orders. You can create a product based on any of your existing products and save it. You can add one or more fields to a product to be displayed on the product list screen. Multiple products can be grouped in a list and displayed on the product list screen. You can view and add a stock level to a product. The stock levels of all the products under a customer are displayed together and you can quickly add a stock level to any of the products under the customer. Keymacro allows you to add any number of users and assign each user their own role based permissions. You can assign a role based on any of the following activities: Accounts payable: Manage Accounts payable or Accounts Receivable 1d6a3396d6
