WinHTTrack Website Copier

WinHTTrack Website Copier is designed to assist you in capturing, saving and viewing websites from where Internet connectivity is available, even when it is down or the connection is weak. A user-friendly application, WinHTTrack Website Copier easily creates a mirror of the requested website and then permits you to save it to your hard drive. The program includes a web interface that permits you to preview the saved website just like any other, without requiring any installation. Moreover, it has a bandwidth limitation feature, which means that you can limit the download speed of the website so that the downloaded copy won't take more than a specific amount of time. The application includes a large number of different options and features that help you capture the entire structure and content of the targeted website. All the options are explained in detail when the program first runs, so you don't need to search for them anymore. In addition, WinHTTrack Website Copier offers features like synchronization, support for image and HTML parsers, and external resolutions that significantly increase the efficiency of the program. You can also configure the mirroring options and the external depth; as a result, you can control how far WinHTTrack Website Copier will browse to download and save the website. In addition, you can also select whether you'd like to have the website copy updated when an Internet connection is available. E-mail This Review Thank You,! I am an educator who travels the country working with schools and organizations on all kinds of projects. Sometimes that involves a full day of design or special project management...other times it's a special interest group on a particular topic...and other times it's just a couple of hours of some important web research. After years of being a working artist, I began to write short stories, screenplays and other works as a way to channel my creativity without taking the pressure of doing art full time. I continue to use my skill sets to develop new projects, but I've primarily shifted my focus to serving as a one-man-band freelance consultant who works with a network of experts who are always on the lookout for a way 3a67dffec
