
Solucionario Fisicoquimica Pons Muzzo __FULL__

Today I wanted to learn more about flex, mx and do. The tutorials are great, and the videos, the mp3 and movies of the slides are also very helpful. Overall, I highly recommend this course to those who want to get their foot in the door with flex. Everything was good, but I found that there were several typo errors in this course. In one of the tutorials, the slide did not have the correct format for the title. In the next lesson, the instructor wrote "solucionario" instead of "solution". The closing slide was incorrectly formatted. I am also not a big fan of watching videos. I prefer text to text, with one exception: when there is a written explanation and audio.

This course was good, with the exception that there are typos in it. This is a wonderful introduction to flex. I would have liked to have the instructor address how he would use this book to use flex with an existing web application. That would be the real value of this course. The instructor has very fast paced slides that are helpful. I really liked this course. However, the instructor has a lot of typos throughout the course. This course is great if you want to learn flex without writing code. The top to bottom layout was a little confusing. I think this is an excellent course. I would suggest the instructor explain the sections of the course in more detail. The instructor is very good. He works very fast and is very detailed. Very good content, very good instructor, I liked the layout Very good content, very good instructor, I liked the layout Very good content, very good instructor, I liked the layout Very good content, very good instructor, I liked the layout Very good content, very good instructor, I liked the layout Very good content, very good instructor, I liked the layout Very good content, very good instructor, I liked the layout There should be more sample code presented. Clear, well-structured, very good content, very good instructor, I liked the layout Clear, well-structured, very good content, very good instructor, I liked the layout Clear, well-structured, very good content, very good instructor, I liked the layout Clear, well-structured, very good content, very good instructor, I liked the layout Clear, well-structured, very good content, very good instructor, I liked the layout
